

JAYDEEP SINGH

FRONT-END DEVELOPER | REACT | JAVASCRIPT | FULL-STACK

Bangalore, Karnataka | +91-6376101460 | singhjaydeep0805@gmail.com | LinkedIn: linkedin.com/in/jaydeepsingh | GitHub: github.com/jaydeepsingh

PROFESSIONAL SUMMARY

B.Tech Computer Science student with hands-on experience building and deploying user-facing web applications using React, JavaScript, Redux, Node.js, Express.js, REST APIs, and MongoDB. Experienced in translating application requirements into functional features, integrating frontend experiences with backend services, and shipping projects to production. Strong foundation in data structures and algorithms, object-oriented programming, databases, operating systems, and problem solving. Seeking Front-End Engineer / Software Development Engineer opportunities at Amazon.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, C, C++, SQL, Swift

Front-End: ReactJS, Redux, JavaScript, User-Facing Web Applications

Backend & APIs: Node.js, Express.js, REST APIs

Databases: MongoDB, SQL

Tools & Platforms: Git, GitHub, Linux, VS Code, Vercel, Xcode

Computer Science: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Network Security, Full-Stack Web Development, Machine Learning Fundamentals

PROJECTS

Skillgap AI | AI-Driven Career Guidance Platform

Full-Stack Project

- Designed, built, and deployed a user-facing AI web application using React and Node.js, hosted on Vercel.
- Built application workflows that analyze user skill gaps against industry benchmarks and present personalized learning paths.
- Integrated backend services and data-driven recommendation logic to support responsive, real-time application functionality.
- Worked across frontend and backend layers to deliver an end-to-end product from implementation through deployment.

AI-Enhanced Smart Traffic Signal System | Computer Vision

Project

Application

- Developed a Python-based computer vision application that detects vehicle density and dynamically adjusts signal timing.
- Designed adaptive control logic and simulated real-time traffic flow, improving simulated intersection throughput and reducing congestion.

Smart Helmet | IoT-Based Safety System

Project

- Built a real-time accident detection system integrating GPS and GSM modules to automatically alert predefined emergency contacts.
- Implemented live-location communication for an end-to-end safety workflow spanning detection, location capture, and emergency notification.

EXPERIENCE

Backend Developer | Shivalaya Enterprises, Siliguri, West

2023–2024

Bengal

- Developed and maintained backend APIs and services supporting core product features and application functionality.
- Built and integrated backend logic for key application features, contributing to reliable data handling and service performance.
- Collaborated with the team on application functionality and data flow, building practical software engineering experience across product services.

Marketing Intern | Growmoredigitally, Kota, Rajasthan

2021–2022

- Supported digital marketing campaigns and content initiatives, developing client communication, analytical thinking, and data-driven decision-making skills.

EDUCATION

Alliance University | Bachelor of Technology in Computer Science

2023–2027

- CGPA: 7.7 | Bengaluru, Karnataka

Yogiraj Public School | 12th (CBSE)

2021–2023

- Percentage: 68% | Kota, Rajasthan

Bhagat Public School | 10th (CBSE)

2018–2020

- Percentage: 60% | Kota, Rajasthan

CERTIFICATIONS

- Developing Front-End Applications with React — IBM
- Oracle Certified — Java Foundations Associate
- Ordered Data Structures — University of Illinois Urbana-Champaign
- Programming in C++ Specialization
- Operating Systems: Overview, Administration & Security — IBM
